Your business operates in the townships. Your investment relies on the support of black customers from the area. We want to collaborate with you and help grow your business.

We want to discuss and agree a business plan and a supply chain which will benefit the local blacks. Where foreigners will not benefit to the detriment of the locals. Where the majority of purchases will be from 100% black owned suppliers (subject to price and quality). Where our collaboration will address "empowerment" in its totality and not just employment.

Note carefully that this is not a political meeting and that no government officials will be invited. We are looking for a partnership with private businesses to benefit and empower our people.

This initiative is from BFASA and The Delft Chamber of Commerce.

Any company who does not attend or participate in this outreach in some way, runs the risk of being banned from the townships. We need your support to demonstrate that you care for the blacks of South Africa and will work with us to find equitable solutions.
